

Job Description

Job Title: Full Stack Software Engineer

FLSA Status: Exempt

Department: Product Development

Reports To: Associate Director, Category Solutions

Location: Bentonville, AR

Company Summary: Nucleous is a software company that builds solutions for retailers and consumer goods companies. We are a fast-growing company that has the privilege of working with some of the largest companies in the world. Our secret sauce is the amazing people on our team, and we work to create an environment that unleashes passion, creativity, and innovation. We are intentional about looking for people who embody our values of Empathy, Passion, Excellence, Intellectual Curiosity, Integrity and Collaboration.

Job Summary: As a Full Stack Software Developer, you will be working closely with a team of software engineers, business experts and product manager on our industry leading category solutions applications for our consumer goods and retailer customers.

Essential Duties and Responsibilities

- Understand business requirements with the ability to translate those into application features
- Produce clean, efficient and high performing source code based on application requirements
- Implement data models and queries on the backend to support front end development requirements
- Perform unit and functional testing
- Troubleshoot and debug existing applications
- Ability to perform well in a fast-paced environment and handle multiple projects simultaneously
- Work as part of a team utilizing proactive communication and collaboration skills
- Other duties as assigned

Qualifications:

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

Education/Experience:

- Required
 - 3+ years of experience designing and building software applications using C# (desktop or web-based)
 - Analytical, creative thinker and problem-solver with demonstrated initiative
 - Experience in building software applications with a database back end
 - Exceptional communication and cross-functional collaboration skills
- Preferred
 - Bachelor's degree in Computer Science or related technical field
 - Experience with WPF and .Net Core

- Experience with Blue Yonder (JDA) Space Planning
- Experience with UI frameworks, such as Blazor, Vue, React, etc.
- Experience developing in Microsoft Azure
- Experience with Docker

Technical Skills: C#, XAML, JSON, XML, Relational database platforms (i.e. MS SQL, MySQL, Oracle, etc...), Python, SQL, JavaScript, HTML, CSS.

Supervisory Responsibilities: None

The above job description is not intended to be an all-inclusive list of duties and standards of the position. Incumbents will follow any other instructions, and perform any other related duties, as assigned by their supervisor.
